

Abdellah ERRAOUI

AI & Cybersecurity Consultant — Engineering Student at EMSI (5th year)

Casablanca, Morocco (open to France) | Phone: +212 7 70 70 76 86 | Email: abdellaherraoui3@gmail.com
LinkedIn: [linkedin.com/in/abdellah-erraooui-153137280](https://www.linkedin.com/in/abdellah-erraooui-153137280) | GitHub: github.com/abdo342003

PROFILE

Fifth-year engineering student at EMSI (Cybersecurity & Network Infrastructure track), working at the intersection of AI and cybersecurity: audit automation, proofs of concept and consulting deliverables. Creator of Exploit AI (LLM agents + Neo4j graph, 85% reduction in audit time) and OT_Shield. Part-time consultant at Fifty Five Digital (OWASP audits, SOC). Seeking a 4 to 6 month end-of-studies internship (PFE) starting January 2027, on-site in France or Morocco.

SKILLS

AI & Security:	LLM agents, audit automation, proofs of concept, AI red teaming, OSINT
GRC & Risk:	OWASP, MITRE ATT&CK; interest in ISO 27001, NIS2, DORA, AI Act
Blue Team & SOC:	Elastic Stack (SIEM), Wireshark, Suricata, Nmap, incident response
Systems & Network:	Linux, Windows Server (Active Directory, GPO), Cisco, VLAN, Docker
Development & Data:	Python (FastAPI), Bash, Celery/Redis, JavaScript, React, PostgreSQL, Neo4j, Git

PROFESSIONAL EXPERIENCE

Cybersecurity & Pentest Consultant — Fifty Five Digital (Mar 2025 – Present, Casablanca)

- Black-box web audits (OWASP Testing Guide v4): identified critical vulnerabilities, with executive summaries and prioritized remediation plans.
- SOC: Elastic Stack (SIEM) monitoring, anomaly detection and investigation (Wireshark, Suricata).
- Deliverables: executive and technical reports, web development and SEO. Clients and detailed findings under NDA.

Security Audit — White Hat — EMSI (2026, Casablanca)

- Black-box security audit on an authorized scope (OWASP methodology): 13 vulnerabilities identified including 4 critical, with remediation recommendations. Technical details under confidentiality.

IT Infrastructure Intern — ISCAE (Apr – May 2024, Casablanca)

- Windows Server 2022 (Active Directory, GPO) and VLAN network segmentation.

PROJECTS

Exploit AI — AI-assisted audit orchestration (Completed)

- LLM agents for defensive triage, structured reporting and risk prioritization (GRC automation).
- Neo4j graph (CVE, CWE, MITRE ATT&CK); FastAPI, Celery/Redis, Docker stack.
- 85% reduction in manual audit time (from 45 to 7 days). Pitched to a jury of experts and investors.

OT_Shield — IDPS & SIEM correlation for critical infrastructure (In progress)

- OPC UA protocol inspection (Scapy), Suricata rules and Elastic Stack correlation.
- Industrial digital twin (TIA Portal V19) for OT cyber-resilience.

EDUCATION

Computer Engineering Degree (Ingénieur d'État) — EMSI Casablanca (2024 – 2027)

- Track: Cybersecurity & Network Infrastructure. Member of the LPRI research lab.

Specialized Technician in Digital Infrastructure — ISFO / OFPPT (2022 – 2024)

- Top of class. System administration, Cisco networking, virtualization.

High School Diploma — Physical Sciences (PC – BIOF) — École Othmane Ben Affane, Casablanca (2021)

CERTIFICATIONS

- Agile Project Management — Google (2026); Blockchain Architecture — LearnQuest (2026)
- NDG Linux Unhatched — Cisco (2023); Unix Workbench — Johns Hopkins (2025)
- Object-Oriented Programming in C++ — EPFL (2025); React Basics — Meta (2025)
- Interactivity with JavaScript — Univ. of Michigan (2025); Successful Negotiation — Univ. of Michigan (2025)

LANGUAGES

Arabic: Native French: C1 English: B2

HONORS & AWARDS

- 3rd place — EMSI Inventors Cup (2nd edition), May 2026: pitched Exploit AI to a jury of experts and investors.
- Ranked team — Hack'Days Bootcamp, UEMF Fez, May 2026.
