# Abdellah ERRAOUI

## Final-year Cybersecurity Engineering Student (EMSI) — Pentest · SOC · DFIR

Casablanca, Morocco | +212 7 70 70 76 86 | abdellaherraoui3@gmail.com
linkedin.com/in/abdellah-erraoui | github.com/abdo342003

**Seeking a 6-month final-year internship — Web & network penetration testing, SOC or incident response / digital forensics**
Available from **February 2027** · Three-party internship agreement provided by EMSI

**14 months of experience in penetration testing & SOC** (Fifty Five Digital), **13 vulnerabilities** (including 4 critical) identified during an EMSI student portal pentest, and **Exploit AI**, a platform that reduced audit time from **45 to 7 days**.

## PROFESSIONAL EXPERIENCE

**Fifty Five Digital** · Intern — Web Penetration Testing & SOC Analyst — Mar–Aug 2025 · Jan–Aug 2026 (14 months)

- **Web penetration testing:** OWASP-based black-box audits of high-traffic client websites (culture, finance), Nmap scans and remediation plans under NDA; Windows Server / AD hardening (GPOs, logging).
- **SOC detection & investigation:** Elastic SIEM alerts; Windows, network and application log analysis; traffic analysis with Wireshark; Suricata signature management (SIDs); resolved an IPS false positive blocking updates (Pass List).
- **SOC lab (2025 project):** WAN / LAN / DMZ architecture — pfSense, Suricata, Elastic SIEM (Fleet, Elastic Agents, Kibana).

**ISCAE** · IT Infrastructure Intern — Casablanca · Apr–May 2024

- Secure deployment of Windows Server 2022 (AD, GPOs) and VLAN segmentation of critical traffic.

## SECURITY PROJECTS

**EMSI Student Portal Pentest (CampuSphere SIS)** · OWASP Testing Guide v4 · Responsible disclosure — Jan–Jul 2026

- External black-box penetration test: OSINT and passive reconnaissance, Azure AD user enumeration (ROPC flow), API analysis (1,100+ Swagger endpoints), Nmap scans, CORS / DMARC tests — **13 vulnerabilities** (4 critical, 5 high, 2 medium, 2 low), with evidence and severity ratings.
- Delivered a confidential 20-page report to management and **followed up on remediation**; preceded by a joint disclosure of *directory listing* on emsi.ma (Jan 2026).

**Exploit AI** · AI-assisted penetration testing orchestration — Hack'Days pitch, UEMF Fès · May 2026

- Neo4j graph correlating CVE, CPE, CWE and MITRE ATT&CK to prioritize vulnerabilities and automate reporting: audit time reduced from **45 to 7 days**; presented to a panel of experts and investors.

**Autonomous Attacker** · Offensive Wi-Fi auditing — Fifty Five Digital · 97 modules

- Python tool (CLI + PyQt6): Wi-Fi 7 / MLO, WPA3-SAE, packet injection (Scapy, ESP32), GPU cracking (hashcat).

## AWARDS

**1st place — KASBAH National Exercise, Digital Forensics Team** · EMSI × CyberSup — Sep 2026

- Investigation of the "MIRAGE" ransomware, competing against teams from Rabat, Marrakech and Tangier (648 students).

**3rd place — EMSI Inventors Cup, 2nd edition** · Two-person team, Casablanca — May 2026

## EDUCATION

**EMSI Casablanca — Engineering Degree, Cybersecurity & Network Infrastructure** · Expected 2027 — 2024–2027

- Semester 9: forensics · ethical hacking · auditing · cryptanalysis · cloud security · risk management · AI for cybersecurity

**ISFO–OFPPT — Specialized Technician Diploma in Digital Infrastructure** · Top of class — 2022–2024

- Two-person final-year project: multi-site Cisco network (OSPF, EIGRP, BGP, MPLS/VRF, VPN), AD DS, DNS, DHCP.

**Othmane Ben Affane High School — Baccalaureate in Physical Sciences** · French international option (BIOF) — 2020–2021

## TECHNICAL SKILLS

| | |
|---|---|
| **Pentest & offensive** | Web, API & network penetration testing · OWASP Testing Guide v4 · OSINT, reconnaissance & enumeration · Nmap, Scapy, aircrack-ng, hashcat |
| **Network fundamentals** | OSI model, TCP/IP, routing & switching · Cisco (OSPF, EIGRP, BGP, MPLS/VRF, VPN) · VLANs, DNS/DHCP · pfSense · GNS3 & Cisco Packet Tracer labs |
| **SOC, detection & IR** | Elastic Stack SIEM (Kibana, Fleet, Elastic Agents), Wazuh (SIEM/XDR), Suricata & Snort, Wireshark, digital forensics, MITRE ATT&CK |
| **Vulnerabilities & audits** | Vulnerability management (severity, CVE / CWE prioritization, remediation), audit reporting, responsible disclosure |
| **Systems** | Linux servers (Ubuntu, **Fedora Server**, **RHEL**), Windows Server (Active Directory, GPOs, hardening), VMware |
| **Development & tools** | Python (automation, FastAPI, PyQt6), Neo4j, Docker, Git, PostgreSQL |

## CERTIFICATES, LABS & LANGUAGES

| | |
|---|---|
| **Job simulation** | Mastercard — Cybersecurity Job Simulation (Forage) · Oct 2026 — Designed a simulated phishing email and interpreted phishing simulation results. |
| **Labs & certificates** | Hack The Box Academy — SOC Analyst (CDSA preparation) & Junior Cybersecurity Analyst (CJCA), in progress · TryHackMe · The Unix Workbench (Johns Hopkins) · NDG Linux Unhatched (Cisco) · OCI Professional, in progress |
| **Languages** | Arabic (native) · French (B2) · English (B2) |
